

Latest Cochrane Review: What is the Most Effective Prophylactic Treatment for Postpartum Hemorrhage?

Latest Cochrane Review. 12:19 30/04/2025

MOLECULES	EFFICACY	SIDE EFFECT	RESULT
OXYTOCIN	✗	✓	Oxytocin in multiple dose or either with ergometrine or misoprostol had grater efficacy.
C-Tocin (CARBETOCIN)	✓	✗	100mcg/ml single dose is sufficient. No need any combination therapy
